CUSTOM REPLACEMENT SASH — Quote Sheet

Group windows with the same specs into a set and enter them in the form below.

Questions: office@historicwindowproducts.com

This form provides the information needed for pricing. Rough sizes are acceptable — final measurements and build details are collected on a separate order form at order time.

Column Details:

- **Window Type** – Double-hung pair, single sash (top or bottom), or casement (includes awning and hopper).
- **Width / Height** – Overall exterior sash measurement, outside edge to outside edge. Do not include sash horns. For a double-hung pair, also note the overall opening height in Notes.
- **Thickness** – Inside face to outside face: 1-1/8", 1-3/8" (most common), or 1-3/4".
- **Lite Configuration** – Lites wide × lites tall per sash (e.g., 2×1, 3×2).
- **Glass** – Single pane (annealed standard) or IGU; Clear, Low-E, Obscure, or Architectural.
- **Finish** – Stain grade, primed, or fully painted.

All sash are custom-made in vertical grain fir. Photos of each window are strongly encouraged; for profile matching we may request a sample sash, section drawing, or additional photos before final quoting. HWP supplies materials only; installation is by others.

Divided lites: ■ True Divided (TDL) ■ Simulated (SDL)	Weatherstripping: ■ Yes ■ No	Lift system (double-hung): ■ Ropes ■ Hidden balances ■ Reuse existing	New hardware needed: ■ Yes ■ No
