HISTORIC WOOD STORM WINDOWS — Quote Sheet

Group windows with the same specs into a set and enter them in the form below.

Questions: office@historicwindowproducts.com

This form provides the information needed for pricing. Rough sizes are acceptable — final measurements and build details are collected on a separate order form at order time.

Column Details:

- **Operating Style** – Top-Hung, Single-Hung, Side-Hinged, Awning-Panel, or Fixed-Panel. See the HWP Storm Window Styles catalog. **Rectangular / square-top openings only** — we do not produce arched-top storm windows.
- **Opening Width** – Measure in front of the blind stops at the top, middle, and bottom of the opening. **Record the smallest measurement.**
- **Opening Height** – Measure from the top blind stop to the sill at the left, center, and right. **Record the smallest measurement.**
- **Glazing** – 1/8" single pane (standard) or 1/2" insulated glass unit (IGU).
- **Muntins** – If the storm should have divided lites, enter lites wide × lites tall (e.g., 3×2). Otherwise enter None.
- **Finish** – Primed or painted.

Provide actual opening measurements — do not add or deduct for fit. Sizing and clearances are confirmed with you at order time. Photos of each window and a drawing of your desired storm window configuration are strongly encouraged. HWP supplies materials only; installation is by others.

Mounting method: ■ Blind stop ■ Overlap casing ■ Flush / Not sure

Name:

Company (if any):

Phone:

Email:

Project Address:

I am a:

■ Homeowner ■ Contractor ■ Architect
